<sup>\*</sup> EVG = electronic ballast units; KVG = conventional ballast units

<sup>&</sup>lt;sup>9)</sup> Bistable relay as relay contact. The switched consumer may not be connected to the mains before the short automatic synchronisation after installation has terminated.

<sup>&</sup>lt;sup>1)</sup> Applies for lamps with max. 150 W.

<sup>&</sup>lt;sup>2)</sup> Usually applies for dimmable energy saving lamps and dimmable 230 V LED lamps. Due to differences in the lamps electronics, there may be a restriction on the maximum number of lamps; especially if the connected load is very low (for 5 W-LEDs).
