

GFVS-Client

Additional licenses GFVS-Client-5 permit the expansion of the GFVS-SafeIV by external access (clients).

In the basic GFVS 4.0 already supports 5 clients for connecting tablets as well as up to four smartphones.

For iPhone, iPad and all mobile phones equipped with Android software, apps can be downloaded free of charge from the Internet shops of Apple and Google.

These clients are then capable of visualising, controlling and accessing installed USB and IP cameras. Authentication and data transmission are encrypted.

GFVS-Client-5
