

Company profile

Eltako is a leading company in Europe when it comes to development and distribution of switchgear, power supply units and electronic energy meters, also with wireless and smart home applications, for installation in buildings and use in control technology. Over 2 million units are sold every year.

The family-owned enterprise which was founded in 1949 is a GmbH (Ltd.) and all capital shares are held by a descendant of the company founder Eng. Horst Ziegler.

The company is based in Fellbach, a city on the outskirts of Stuttgart in the federal state of Baden-Württemberg.

The production plant for electromechanical switchgear and the central warehouse are located in Lossburg, a small town in the Black Forest.

Electronic devices are manufactured in a factory in Shenzhen which is monitored by certified according to ISO 9002.

Research & development, quality management, customer service, sales management and marketing are based at the headquarters in Fellbach.

The company name Eltako as well as further trademark rights are registered at the European Office of Trademarks as community trademarks and are protected accordingly.

In line with the importance that electronics have assumed in the company turnover, the Eltako logo was changed to include the internationally understandable word "ELECTRONICS". Although electromechanical switchgears are produced in high numbers, electronics cover more than 80 percent of total turnover.
