

MS

Multisensor

The MS multi sensor sends the current weather details, including brightness (from three points of the compass), wind, rain and frost via a connecting wire to the bus multifunction sensor relay FWS61-24 V DC. **LxBxH: 118x96x77mm. Power supplied by switch node power supply unit SNT61-230V/24V DC-0,25A. Smart Home sensor.**

Evaluation is carried out using the Wireless Building Visualisation and Control Software GFVS, the wireless multifunction sensor relay FMSR14, actuators FSB14 and FSB71 and the weather data display FWA65D.
