FMH2-	Wireless Sensors Mini Hand-held Transmitters

Wireless 2-way mini hand-held transmitter 43x43 mm, 16 mm high. Weighs only 30 grams. Generates the power for wireless telegrams itself when the button is pressed, therefore there is no battery. Smart Home sensor.

The batteryless mini hand-held transmitter FMH2 contains the same wireless module as the cordless wireless pushbuttons FT4 and has 1 rocker. It can transmit 2 evaluable wireless telegrams. The rocker is laser engraved with 0 and I.

This wireless hand-held transmitter can be attached to the wall, on glass or on furniture using an enclosed adhesive foil.

The mini hand-held transmitter FMH2S is also prepared to attach a key ring.

The mini hand-held transmitter is supplied with the following engraving:
0 (= OFF) on upper part and I (= ON) on bottom part.

The wireless modules integrated in the mini hand-held wireless transmitter can be taught-in encrypted as described in the operating instructions in all encryptable actuators of the Series 61 and Series 71 as well as the FAM14. This requires the FTVW wireless pushbutton encryption rocker on page 8-5. Encryptable actuators bear the pictogram ⊶.

Rockers laser engraved page 8-15.

WEEE registration number DE 30298319
