

Rain sensor RS

The rain sensor RS reports rain to the sensor relay LRW12D connected in series once per second. A standard telephone wire is sufficient as connecting lead: J-Y(ST)Y 2x2x0.8 or equivalent. 100m line length is permitted. Solid plastic housing, l x w x h = 118x96x77mm. Protection degree IP44. Temperature at mounting location -30°C to +50°C. A power supply unit SNT61-230V/24V DC or SNT12-230V/24V DC (chapter Z) is required for the power supply, including heating of the rain sensor (1.2W). An LED lights up green when the supply voltage is applied and lights up yellow for rain.
