

WP50

WET.PROTECT e.nautic 50 ml.

High-performance protection against humidity, moisture and corrosion.

This water blocker completely infiltrates any moisture and humidity. It creates a micro-thin protective film with extremely water repellent effect. The dielectric strength is extremely high with 200kV/mm.

Due to the salt water resistance, it is not only perfect for the use in winter as it protects against the effects of road salt, but also for applications close to the sea.

Wireless pushbuttons treated with this spray according to the operating manual even remain fully functional outdoors on the weather side for years
