

**KNX ENO 636**

**Bidirectional gateway between EnOcean wireless and KNX bus with 32 channels from Weinzierl, 81 x 81 x 25 mm.**

The KNX ENO 636 secure acts as a bidirectional gateway between EnOcean Wireless and the KNX/ EIB bus. Control commands and measured values can be transmitted by EnOcean wireless sensors to the KNX bus, for example to control KNX actuators. Similarly, EnOcean wireless actuators can be controlled by KNX. The KNX ENO 636 secure from Weinzierl allows encrypted communication with security compatible EnOcean devices.

The KNX ENO 636 secure has 32 wireless channels and accepts over 100 EEP (EnOcean Equipment Profile), it allows an easy and secure connection from different EnOcean sensors and actor to a KNX installation.

In addition the gateway offers logic functions and comprises an integrated wireless repeater.

**The configuration** is done with the KNX ENO-Tool, downloadable on [weinzierl.de](http://weinzierl.de).

**Surface mounting** by means of a 55 mm flush mount box. Power is supplied over the KNX bus.

**The repeater function** is designed to bridge large distances between sensors and actuators. The KNX ENO 636 is a Level 1 wireless repeater.
