Water Sensor FWS60

Fig. shows the bottom

FWS60 Water sensor

Water sensor FWS60 for connection to the wireless transmitter module FSM60B pure white. LxBxH: 60x46x30 mm (dimensions without screw connection). With 150 cm connecting cable. Smart Home sensor.

The water sensor is placed with the sensor face down on the floor of the room for monitoring of water contamination. The connecting cable runs upwards and is possibly secured with cable clips. The 2-wire connection is made to the X1-double terminal inside of the wireless transmitter module FSM60B. The connection cable can be shortened but not lengthened.
